There are a number of supports and services provided by government and the community sector for people with disability across Australia.

The NDIA may identify that your supports are best delivered by these other service systems.

This page provides a list of organisations who can help with support, both nationally and in different states and territories.

The Agency's Local Area Coordinators (LACs) and early childhood partners may also help with linking you to these services. See also [help for children younger than 7](#).

You can find [LAC and early childhood partners in your area](#). Some other resources are listed below.

You might be interested in the [Information, Linkages and Capacity Building \(ILC\) program](#), managed by the Department of Social Services. It provides funding to organisations to deliver projects in the community that benefit all Australians with disability, their carers and families.
