Plan activation refers to the amount of time between plan approval and the commencement of the participant receiving support.

Note: Plans approved after the end of 2017-18 Q3 have been excluded from the charts. They are relatively new and it is too early to examine their durations to activation.

Plan activation can only be approximated using data on payments. As there is a lag between when support is provided and payments made, these statistics are likely to be conservative. That is, it is likely that plan activation is faster than presented. Further, in-kind supports have been excluded from the calculation, which contributes to the conservative figures.

Has the NDIS helped? Participants

Participants who entered the Scheme between 1 October 2016 and 30 September 2017 and had a plan review approximately one year later were asked questions about whether the NDIS had helped them.

The percentage responding 'Yes' was highest for the domain of Daily Living for all age groups.

The national report includes data on participants who entered the Scheme in 2016-17 Q1 and were asked questions about whether the NDIS had helped them at the end of their second year of the Scheme (as well as at the end of their first year in the Scheme). This gives an indication of the effect of the NDIS on participants over a longer period of time. As only one quarter of data is available, results by State/Territory are not yet available.

Participant Satisfaction

98% of participants rated their satisfaction with the Agency's planning process as either good or very good in the current quarter. This is a significant improvement since the early quarters of transition.

The Participant Pathway Review aims to improve the participant experience.

A new participant satisfaction survey has been developed. Going forward it will better record the experience of NDIS participants, and their families and carers, at different stages of the participant pathway.

Participant satisfaction dropped in the early quarters of 2016-17, but was in line with trial experience this quarter.
