Disability Reform Council Quarterly Performance Report

Tasmania – 30 June 2017

Overview

This report is the fourth quarterly report during the NDIS Transition period, which commenced on 1st July 2016.

Summary

Participants and planning

352 additional participants with plans this quarter.

18 children have a confirmed referral to the ECEI gateway.

100% of the 30 June 2017 cumulative bilateral estimate has been met.

The satisfaction rating remained high with 97% of participants surveyed in the quarter rating their satisfaction with the Agency either good or very good.

Committed supports and payments

\$301.3 million of supports has been committed to 2,229 participants. This includes \$131.7 million of support in respect of trial, \$98.4 million in respect of 2016-17 and \$71.3 million for later years.*

\$162.7 million has been paid to providers and participants.

Overall 55% of committed supports were utilised in 2013-14. 71% of committed supports were utilised in 2014-15 and this has increased to 78% in 2015-16. In 2016-17, utilisation of committed supports has decreased to 69%. As there is a lag between when support is provided and when it is paid, the 69% in 2016-17 will increase.

Providers and market

730 approved providers.

60-90% of payments made by the NDIA are received by 25% of providers.

24% of services providers are individual/sole traders.

Mainstream Interface

91% of active participants with a plan approved in 2016-17 Q4 access mainstream services.

The proportion of participants entering in the current quarter accessing mainstream services is higher compared to prior quarters.

*Note: The \$71.3 million committed in future years is due to current plans in place that have an end date past 30 June 2017.

Participants and Planning

As the transition phase to full scheme continues, the NDIS in Tasmania continues to grow with 352 additional participants with approved plans this quarter.

Participants and Planning

The NDIS is transitioning to full-scheme in line with phasing schedules bilaterally agreed by State/Territory and Commonwealth governments.

Participant Profiles

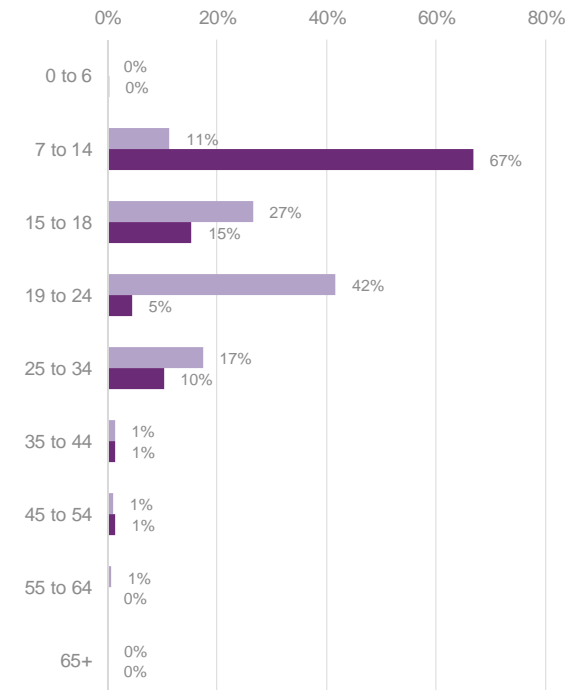

Demographic profile of active participants with a plan approved as at 31 March 2017, compared with plan approvals in the quarter of 2016-17 Q4.

For participants with a plan approval in the current period, around 63% have a level of function between 4 and 7 (moderate to high levels of function). 28% of participants with approved plans have low level of function (level 11 and above). This result is influenced by the phasing schedule.

Note: High, medium and low function is relative within the NDIS population and not comparable to the general population.

Plan Management Support Co-ordination

The proportion of participants who are fully or partly self-managing their plan is higher in 2016-17 Q4 (18%) compared with the prior quarters of 2016-17 (9%), and 32% of participants who have had a plan approved in 2016-17 Q4 have support coordination in their plan.

Plan Activation

Plan activation refers to the amount of time between plan approval and the commencement of the participant receiving support. 52% of plans approved in Quarter 1 were activated within 90 days of approval, 45% of plans approved in Quarter 2 were activated within 90 days of approval, and 62% of plans approved in Quarter 3 were activated within 90 days of approval.

Plan activation can only be approximated using data on payments. As there is a lag between when support is provided and payments made, these statistics are likely to be conservative. That is, it is likely that plan activation is faster than presented. Further, in-kind supports have been excluded from the calculation, which further contributes to the conservative figures.

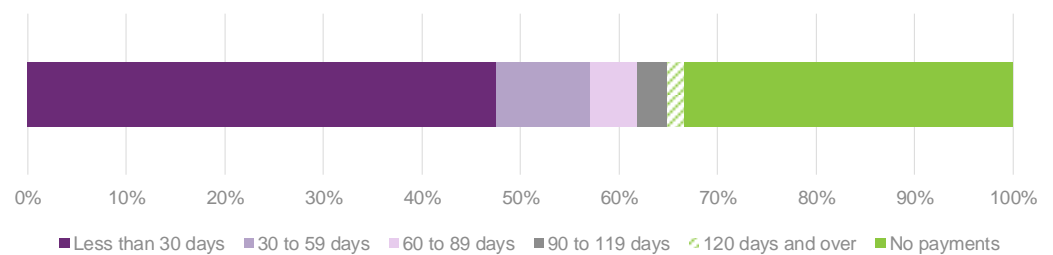

Duration to Plan activation for initial plans approved in 2016-17 Q1

Duration to Plan activation for initial plans approved in 2016-17 Q2

Duration to Plan activation for initial plans approved in 2016-17 Q3

Note: Given that plans approved in Quarter 4 are relatively new, it would be too early to examine the duration to plan activation for these plans and hence these have been excluded from the charts.

Participant Outcomes

Number of questionnaires completed in 2016-17 by Short Form Outcomes Framework (SFOF) version.

Baseline outcome measures were collected on 100% of participants receiving their initial plan in 2016-17. Most were school-aged children or young adults. About half of young adults were happy with their level of independence, and about half of parents/carers of school aged children thought they were developing independence. More than three quarters of young adults wanted more choice and control in their life. Levels of employment were very low.

For family/carers of children aged 0 to 14, fewer than one half have a paid job and only 46% say they are able to work as much as they want. Fewer than one half say they are able to see family and friends as much as they want.

Participant Outcomes

Key measures on baseline social, economic and independence outcomes. These will be monitored into the future.

For the school to 14 group, 69% of the participants reported being able to make friends outside of their family or carers. Participation in age appropriate community, cultural or religious activities was highest among the 25 and over group with 32%.

Around 24% of 25+ year olds had a paid job.

Selected key baseline indicators for participants

Participant Satisfaction

97% of participants rated their satisfaction with the Agency as either good or very good in the current quarter. This has increased since the last quarter.

Proportion of participants describing satisfaction with the agency as good or very good - by quarter

Participant satisfaction continues to be high, but has dropped during transition, compared with trial site experience.

Note: Participant satisfaction results are not shown if there is insufficient data in the group.

Committed Supports and Payments

Both committed and paid supports to participants are increasing in line with the growing scheme.

To date funding committed to participants with an approved plan amounts to \$301.3 million (including support periods in the future), of which \$162.7 million has been paid.

This includes \$131.7 million of support in respect of trial, \$98.4 million in respect of 2016-17 and \$71.3 million for later years.

AS THERE IS A LAG BETWEEN WHEN SUPPORT IS PROVIDED AND WHEN IT IS PAID, THE 69% IN 2016-17 WILL INCREASE.

*Note: The \$71.3 million committed in future years is due to current plans in place that have an end date past 30 June 2017.

Committed Supports and Payments

Committed amount by year that the support is expected to be provided, compared with committed supports that have been used (paid).

Of the \$301.3 million that has been committed in participant plans, \$162.7 million has been paid to date.

In particular, for supports provided in:

2013-14 : \$10.0m has been paid

2014-15 : \$36.6m has been paid

2015-16 : \$48.6m has been paid

2016-17 to date: \$67.5m has been paid

Total paid	10.0	36.6	48.6	67.5	0.0	162.7

Committed Supports and Payments

A lower proportion of initial plan approvals in 2016-17 Q4 have average annualised committed supports greater than \$30,000 compared with participants who entered in prior quarters when participants with shared supported accommodation (SSA) supports are included. This is also the case when SSA participants are excluded.

Distribution of average annualised committed supports by cost band (including SSA)

Distribution of average annualised committed supports by cost band (excluding SSA)

Committed Supports and Payments

Average annualised committed supports for participants in the 25-34 year age group was higher in 2016-17 Q4 and lower for participants aged 7 to 24 years. This is likely to reflect the phasing schedules outlined in the bilateral agreements.

Average annualised committed supports by age band

Note: Average annualised committed supports are not shown if there are insufficient data in the group

Committed Supports and Payments

Participants with a primary disability of Autism and initial plan approval in 2016-17 Q4 had the largest change in average annualised committed supports when compared with participants who entered in prior quarters.

Average annualised committed supports by primary disability group

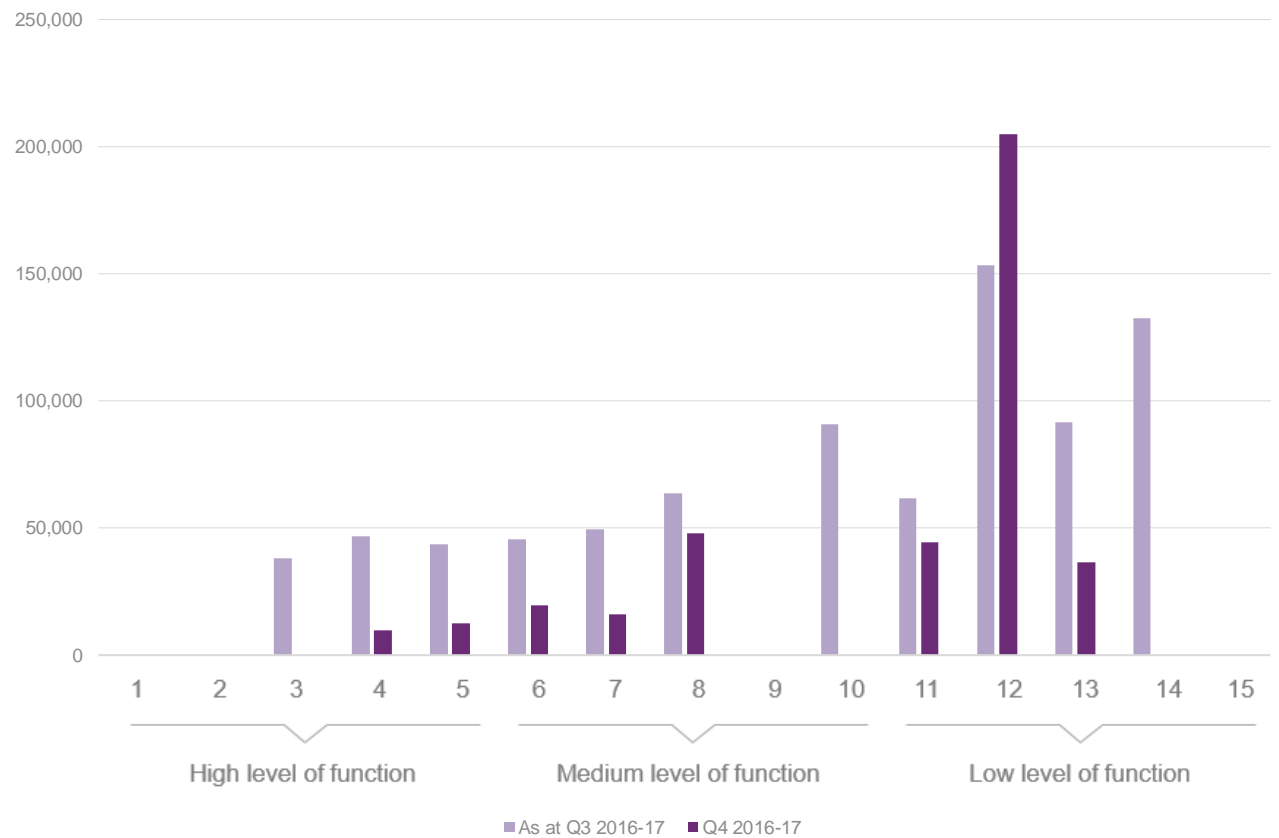

Note: Average annualised committed supports are not shown if there are insufficient data in the group

Committed Supports and Payments

The average annualised committed supports for participants with initial plan approval as at 30 June 2017 and prior quarters is lower for participants at most levels of function.

Average annualised committed supports by level of function

Note 1: Average annualised committed supports are not shown if there are insufficient data in the group.
 Note 2: High, medium and low function is relative within the NDIS population and not comparable to the general population.

Committed Supports and Payments

Utilisation of committed supports by year that the support was expected to be provided as at 31 March 2017, compared with 30 June 2017. As there is a lag between when support is provided and when it is paid, the 69% in 2016-17 will increase.

Utilisation of committed supports as at 31 March 2017 and 30 June 2017

The utilisation of committed supports has increased for supports provided in 2015-16. This percentage has increased during 2016-17 YTD.
