Note: a new support catalogue has been introduced by the NDIS to encourage outcome-focused support provision. The above categories reflect the new support catalogue and past supports have been mapped to the new catalogue.
 Note: the committed amounts above include past and current plans whereas the descriptions relate to the current plans only to give an indication of the quantum of support in participant plans at this point in time.

Individual Participant Goals and Outcomes Framework

Governed by the National Disability Insurance Scheme Act 2013, the NDIS must uphold the objectives and principles set out in the Act which support the importance of individual outcomes. To this end, the NDIS has developed a framework to inform and entrench an outcomes centric approach to the various aspects of the operation of the Scheme.

It is also important that the agency focuses on the goals of participants which are included in their plans in order to seek out and fund supports to help participants achieve their goals. The below shows the support needs for active participants with approved funded supports by life domain as well as the outcome statements.

* Life domains are areas of focus for participants' goals, objectives and strategies. Participants can have funded supports across multiple life domains (e.g. 4,176 males have funded supports relating to Daily Living and 252 females have funded supports relating to Independence).
